Introduction

News Feeder is a service which acts as an online news feed aggregator. Its main purpose is to provide a single location and format to view news content instead of our users having to go to a number of different websites for their specific news.

News Feeder allows its users to specify preferences as to which type of articles they wish to view. These can be based on a number of criteria such as location, category, author, publishing site or specific feed URL's. The system will crawl feeds which match these criteria and store the articles in the system's database. The stored content can be of any media type, including text, images, video and geolocation information.

Our users can then view the stored content in an organised layout, similar to that of a standard news sheet. These sheets will allow our user's to set a number of filtering options to ensure certain types of content are not displayed to them.

Getting Started

If you are having trouble installing the News Feeder Downloader application, please see the troubleshooting section.

Minimum Requirements

To install the News Feeder Downloader application you must meet the following requirements:

- Web Browser (for initial download)
- Runs on Microsoft Windows 2000 or greater
- Runs on Linux 2.6.x kernel
- Runs on Mac OS X
- Support for 32-bit and 64-bit systems
- Working network connection
- Printer (if printing)

To use the News Feeder web service you must meet the following requirements:

- Web Browser
- Screen resolution of 480x320 or greater
- Working network connection
- Printer (if printing)

Installing

The News Feeder web service requires no installation. Simply visit the website.

To install the News Feeder Downloader application, please follow these steps:

Step 1. Using your web browser go to the download link below:

<http://newsfeeder.co/download/>

Step 2. Select the appropriate download link for your operating system. For more information, please see: <http://newsfeeder.co/faqs/>

Step 3. Download and open your installer

Step 4. Follow the steps of the installer

Uninstalling

To uninstall the News Feeder Downloader application, please follow these steps:

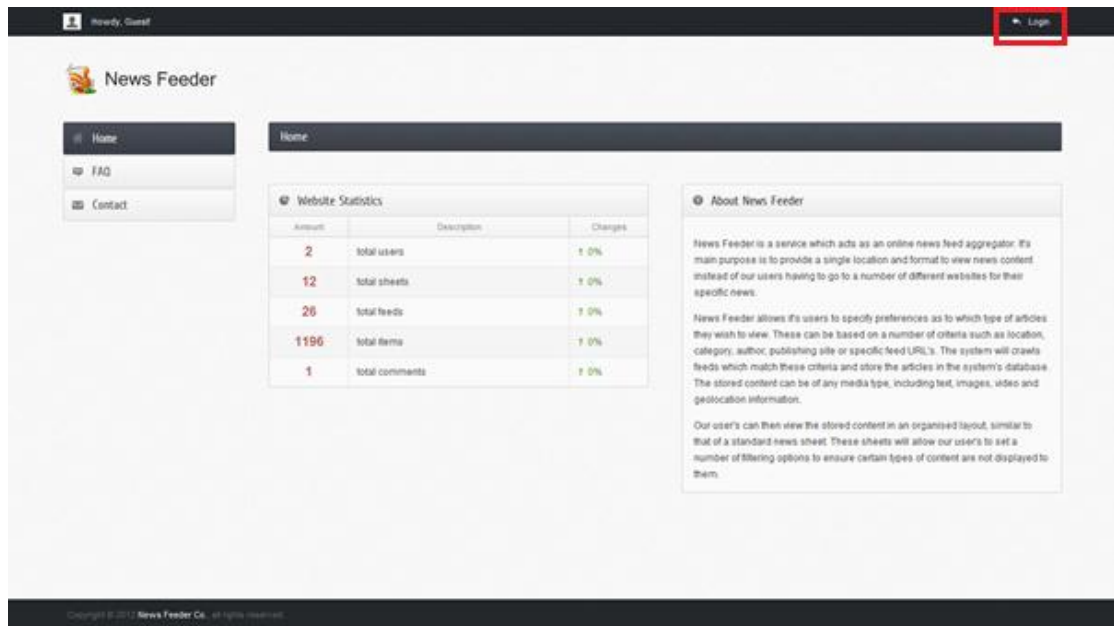

Windows Vista / Windows 7

- Step 1.** Open the Windows Start Menu
- Step 2.** Click the “All Programs” link
- Step 3.** Scroll down, and click the “News Feeder Downloader” program folder
- Step 4.** Click the “Uninstall” link in the program folder
- Step 5.** Follow the uninstaller prompts

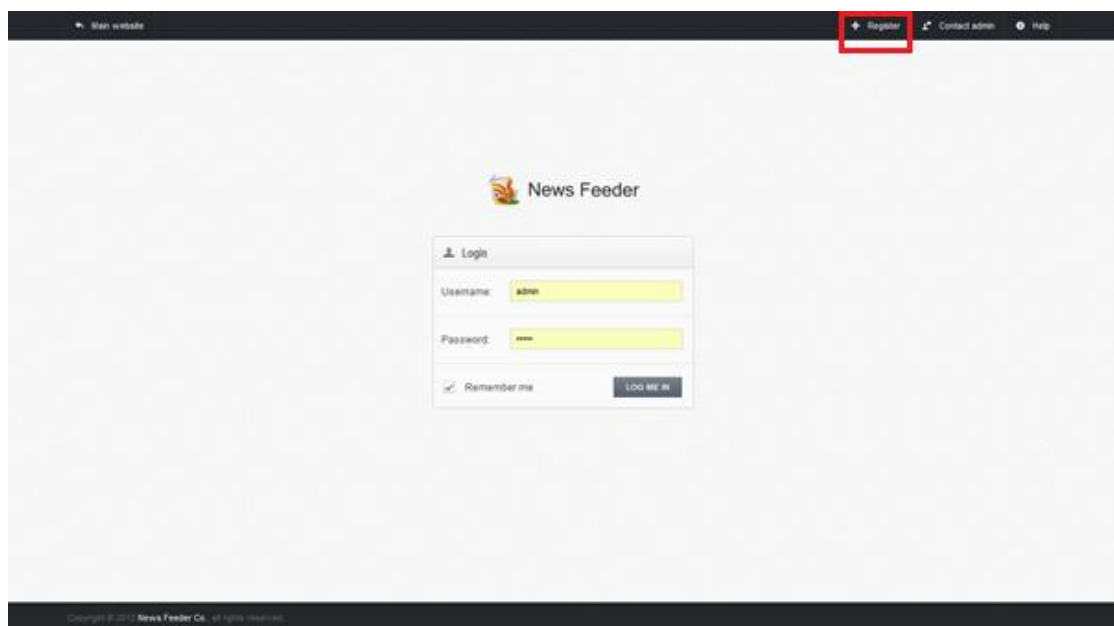

Account Setup

Creating your account

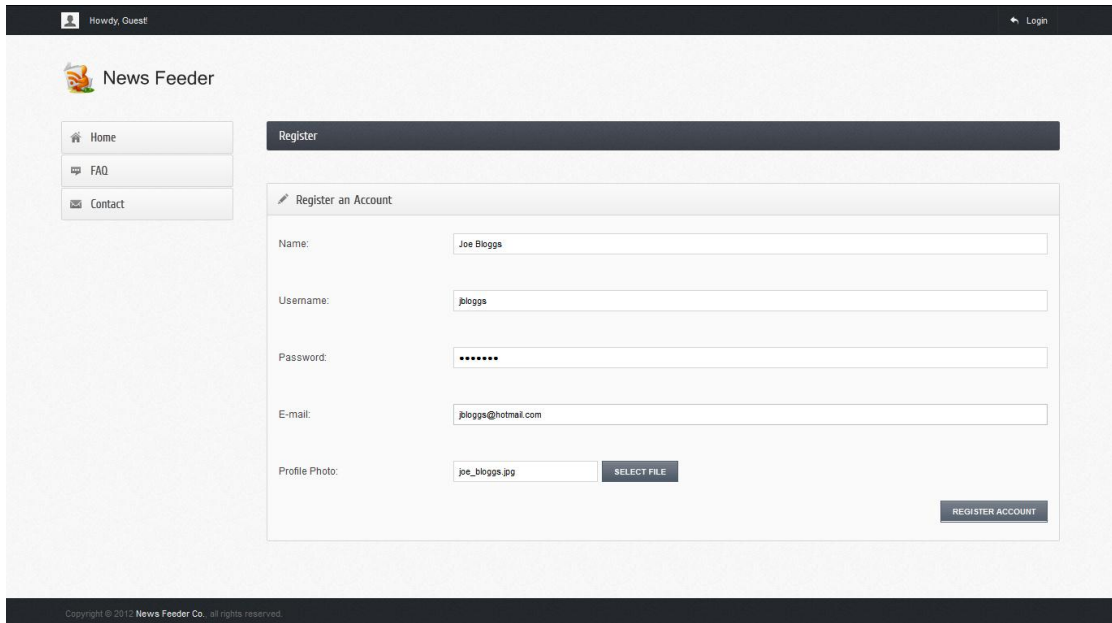

1. Navigate to the News Feeder website, <http://newsfeeder.co>.
2. Click the **Login** link in the upper-right corner.

3. Click the **Register** link in the upper-right corner.

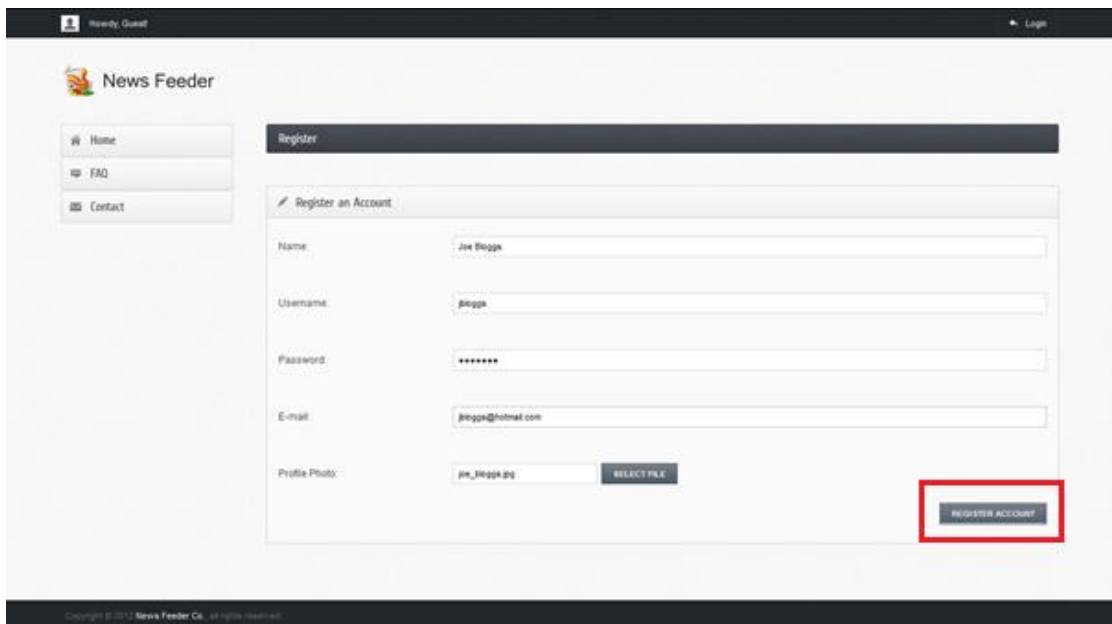

4. Fill in your full name, username, password, e-mail address and optionally select a profile picture.

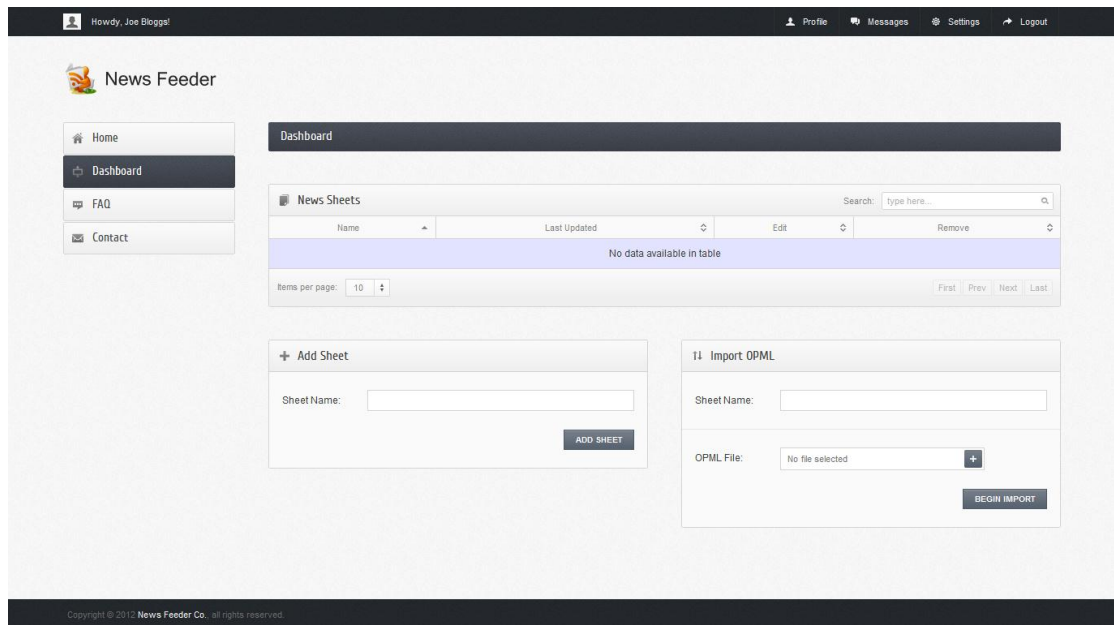

The screenshot shows the 'News Feeder' website interface. At the top, there is a navigation bar with 'Howdy, Guest!' and a 'Login' link. Below this, the 'News Feeder' logo is on the left, and a 'Register' button is on the right. The main content area is titled 'Register an Account' and contains several input fields: 'Name' (filled with 'Joe Bloggs'), 'Username' (filled with 'jbloggs'), 'Password' (filled with '*****'), 'E-mail' (filled with 'jbloggs@hotmail.com'), and 'Profile Photo' (filled with 'joe_bloggs.jpg'). A 'SELECT FILE' button is next to the profile photo field. A 'REGISTER ACCOUNT' button is located at the bottom right of the form. The footer contains the text 'Copyright © 2012 News Feeder Co. All rights reserved.'

5. Click the **Register Account** button in the lower-right corner.

This screenshot is identical to the previous one, but the 'REGISTER ACCOUNT' button at the bottom right of the form is highlighted with a red rectangular box, indicating the next step in the process.

6. If your account registration was successful, you will now be in your Account Dashboard.

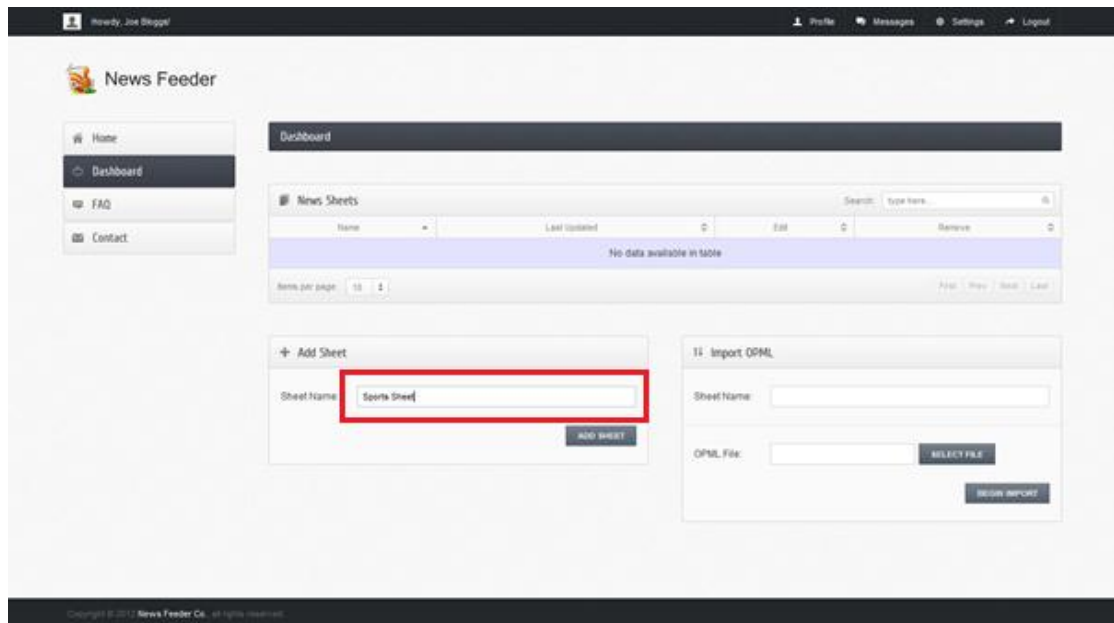

Signing in to your account

1. Navigate to the News Feeder website.
2. Click the **Login** link in the upper-right corner
3. Enter your username in the **Username** field.
4. Enter your password in the **Password** field.
5. Check the **Remember Me** checkbox if you want the website to remember these credentials the next time you login.
6. Click the **Log Me In** button.

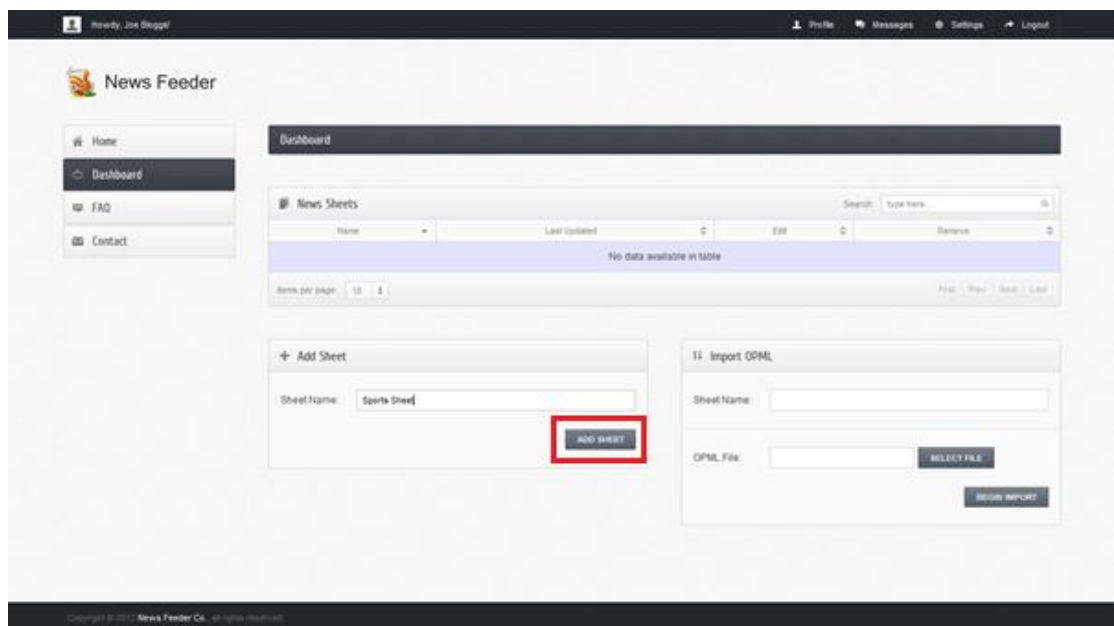

Using the web interface

Adding a sheet

1. Navigate to your Account Dashboard.
2. Enter your new sheet name in the **Add Sheet** section.

3. Click the **Add Sheet** button under your new sheet name.

4. After adding your new sheet you will be presented with a success message.

The screenshot shows a web application interface for a 'News Feeder'. At the top, a dark navigation bar contains the user's name 'Howdy, Joe Bloggs!' and links for 'Profile', 'Messages', 'Settings', and 'Logout'. On the left, a sidebar menu includes 'Home', 'Dashboard' (which is highlighted), 'FAQ', and 'Contact'. The main content area is titled 'Dashboard' and features a prominent green success message: 'SUCCESS: Your sheet was successfully added'. Below this, there is a 'News Sheets' section with a search bar and a table. The table has columns for 'Name', 'Last Updated', 'Edit', and 'Remove'. It contains one entry, 'Sports Sheet', which was updated 'A moment ago'. Below the table are pagination controls showing 'Items per page: 10' and buttons for 'First', 'Prev', 'Next', and 'Last'. At the bottom of the dashboard, there are two panels: 'Add Sheet' with a 'Sheet Name' input field and an 'ADD SHEET' button, and 'Import OPML' with a 'Sheet Name' input field, an 'OPML File' input field with a 'SELECT FILE' button, and a 'BEGIN IMPORT' button.

Viewing a sheet

1. Navigate to your Account Dashboard.
2. Click on the sheet name of the sheet you wish to view.

Viewing an item

1. Navigate to your Account Dashboard.
2. Click on the sheet name of the sheet which contains the item you wish to view.
3. Click on the item title to navigate to that item.

Managing global settings

1. Sign in to News Feeder.
2. Click the **Settings** link in the upper-right corner.
3. In the Settings page, change the global settings as per the following:
 - **Enable SSL** – Checked if you would like SSL to be enabled. *Note: for a description of SSL please see the 'How Secure is News Feeder?' section in the FAQ.*
4. Click **Save Changes**.

Managing profile information

1. Sign in to News Feeder.
2. Click the **Profile** link in the upper-right corner.
3. In the Profile page, change the global settings as per the following:
 - **Password** – Enter a new password for your account. Confirm the password by retyping it in the next input field. *Note: leaving this field blank will keep your current password. Passwords are case sensitive.*
 - **Name** – Enter your name to change how we greet you. Full names are optional.
 - **E-mail** – Enter your new e-mail address to change where we send notifications. Please confirm you can access this e-mail address.
 - **Profile Picture** – Select an image from your computer to set your new profile picture.

UPDATE PROFILE

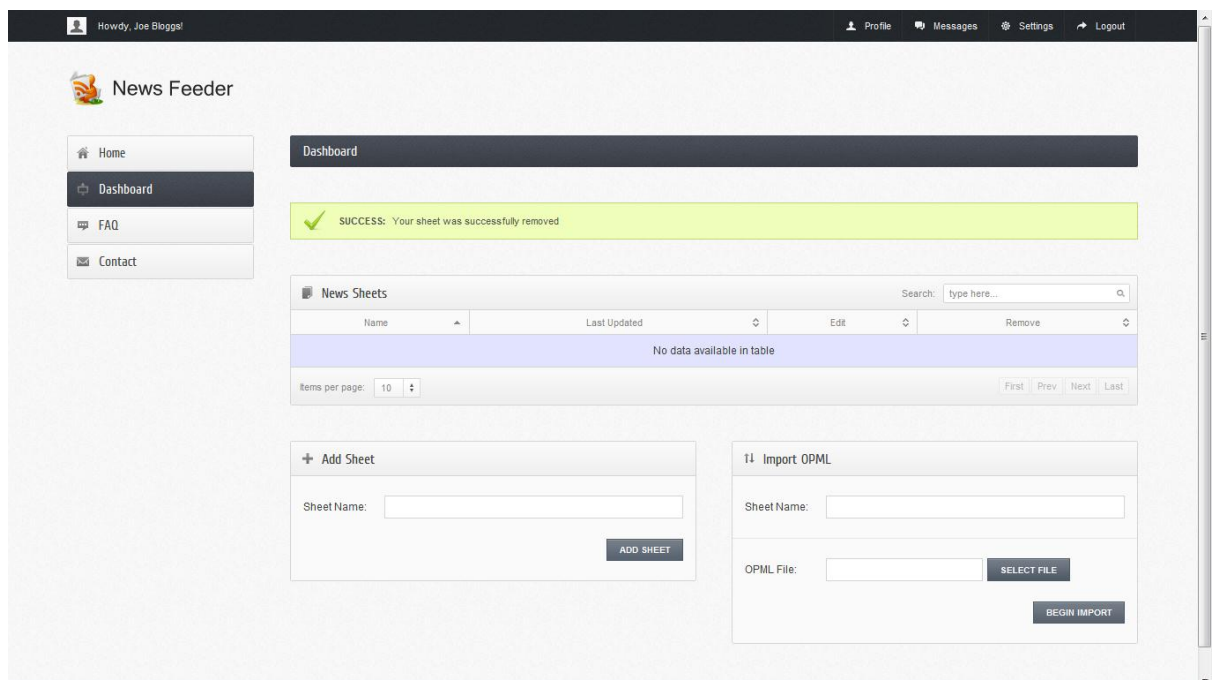

4. Click **Update Profile**.

Removing a sheet

1. Navigate to your Account Dashboard.
2. In the **News Sheets** section, click the **Remove** link in the same row as the sheet you want to delete.

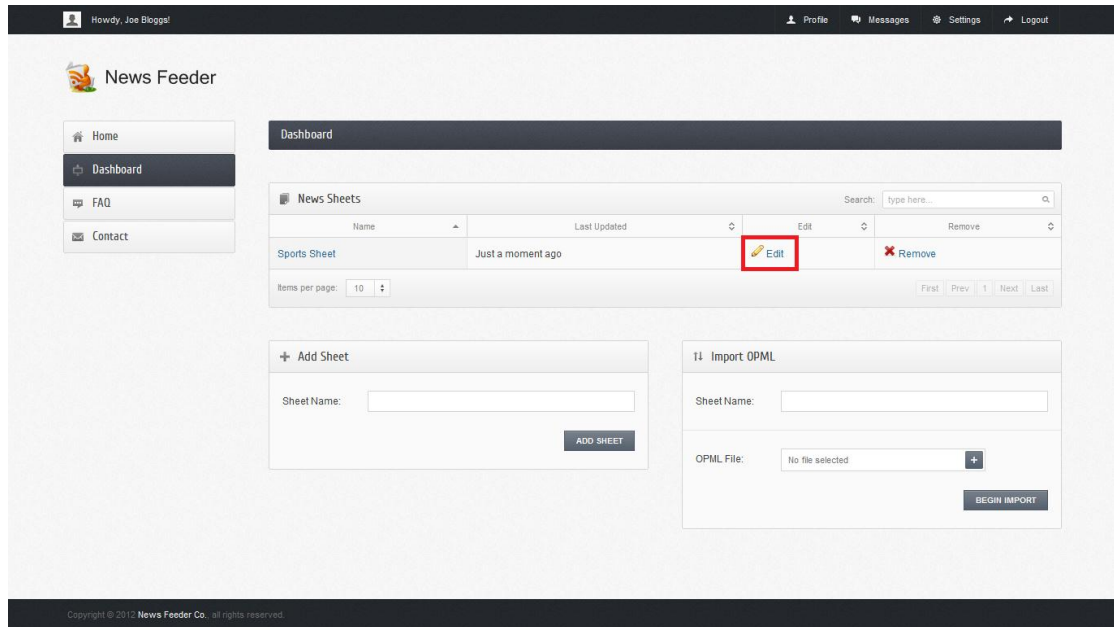

3. When prompted, confirm you wish to delete your sheet.
4. After adding your new sheet you will be presented with a success message.

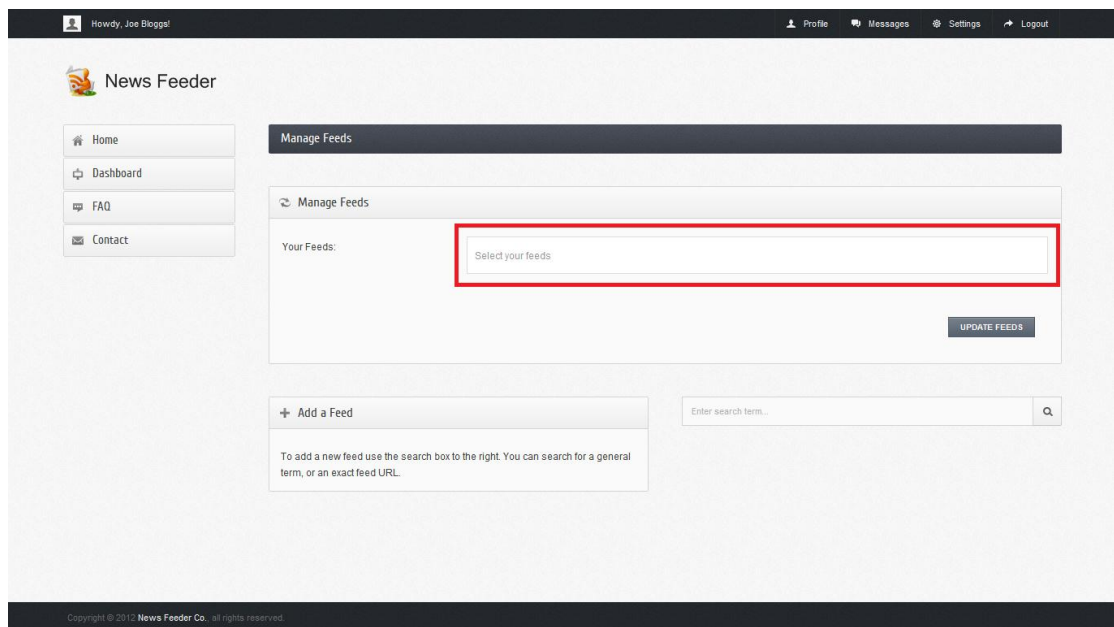

Adding feeds to a sheet

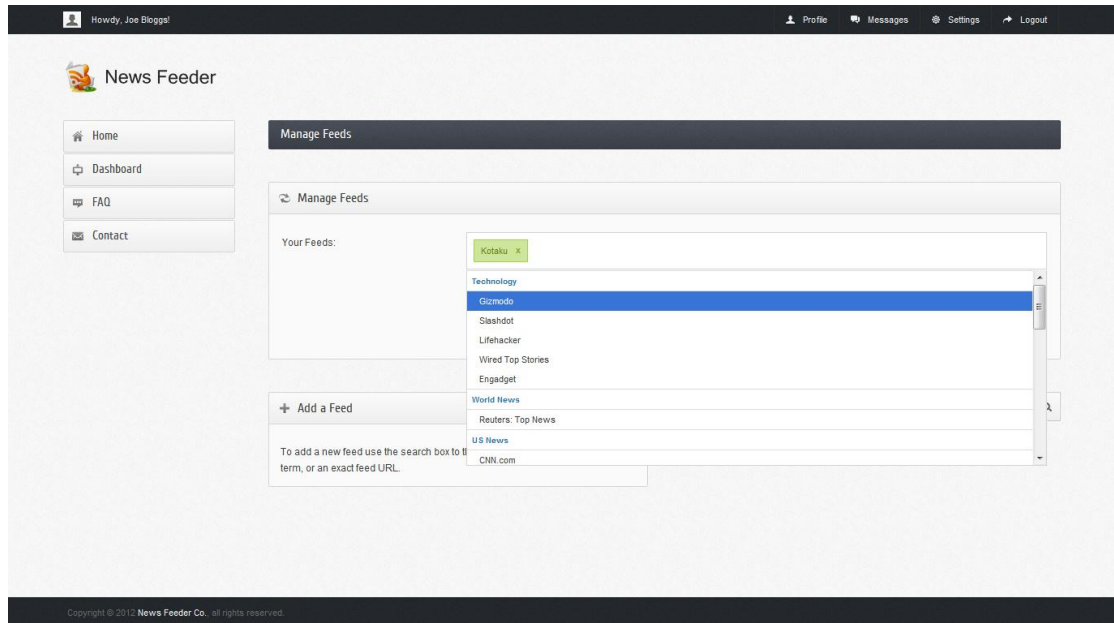

1. In the **News Sheets** section, click the **Edit** link in the same row as the sheet you want to add feeds to.

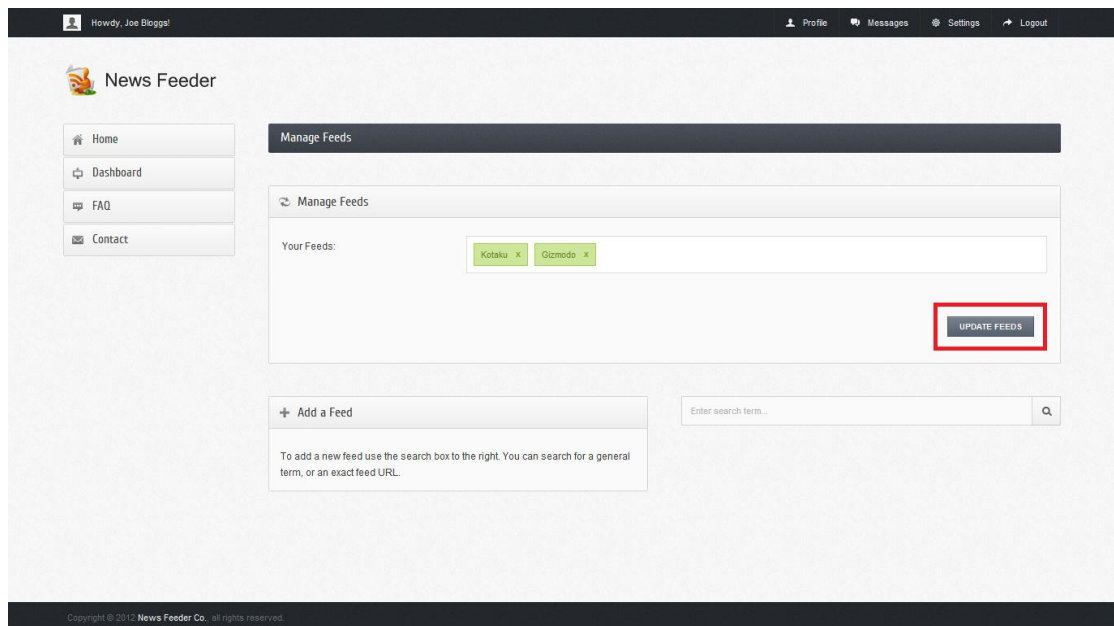

2. Click the **Select your feeds** box to reveal the available feeds.

3. Select which feeds you would like to add to your sheet. You may remove unwanted feeds by clicking the **X** in the green box.

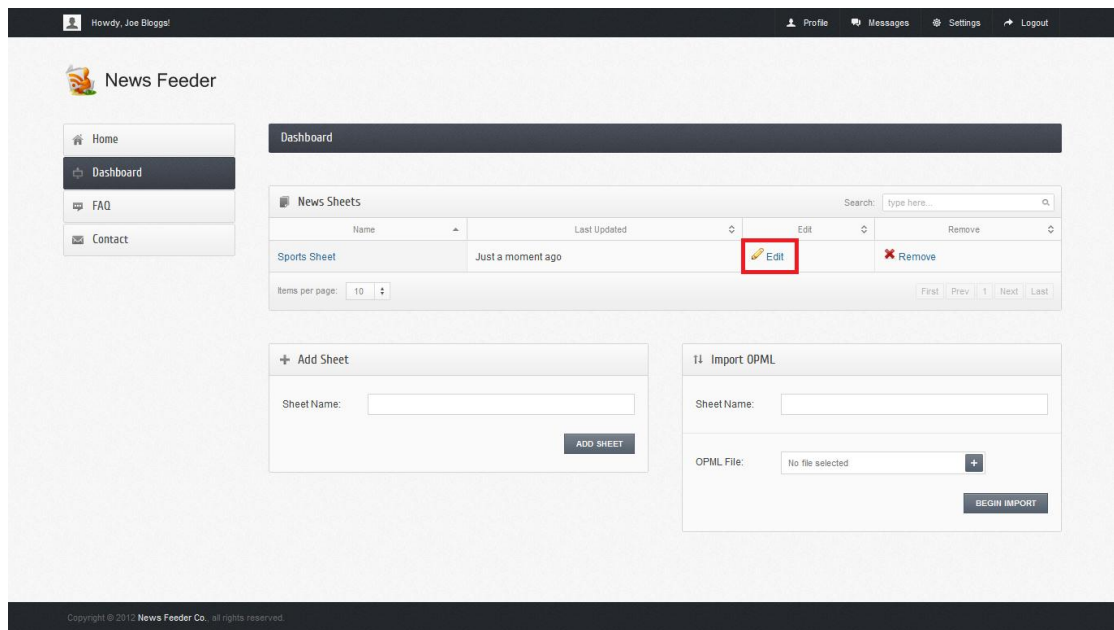

4. Once you have finalized your feeds, click the **Update Feeds** button.

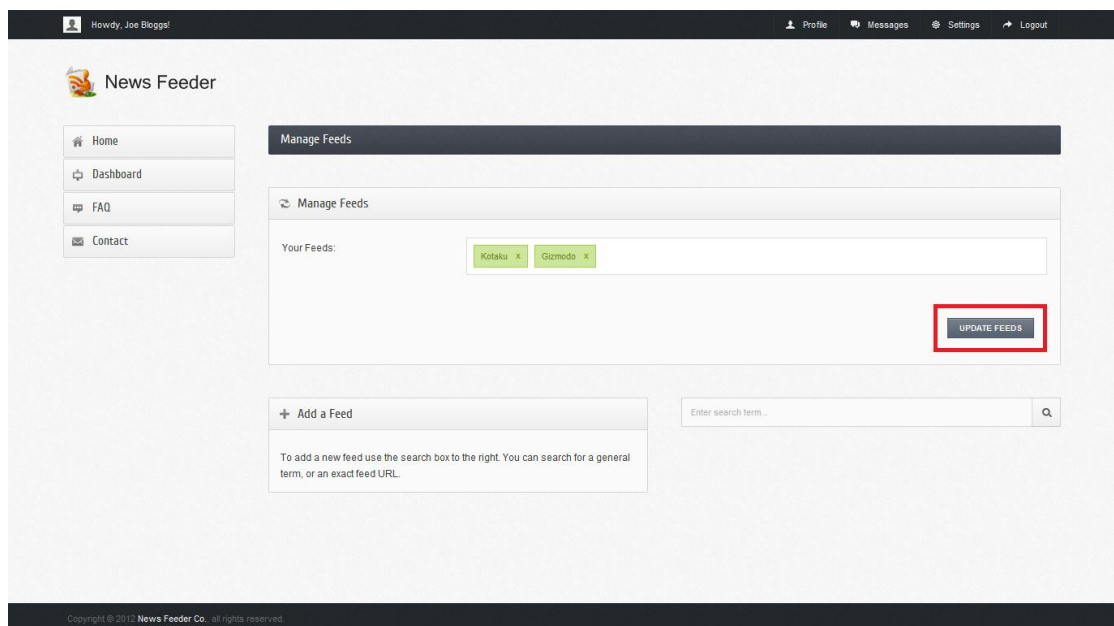

Removing feeds from a sheet

1. In the **News Sheets** section, click the **Edit** link in the same row as the sheet you want to add feeds to.

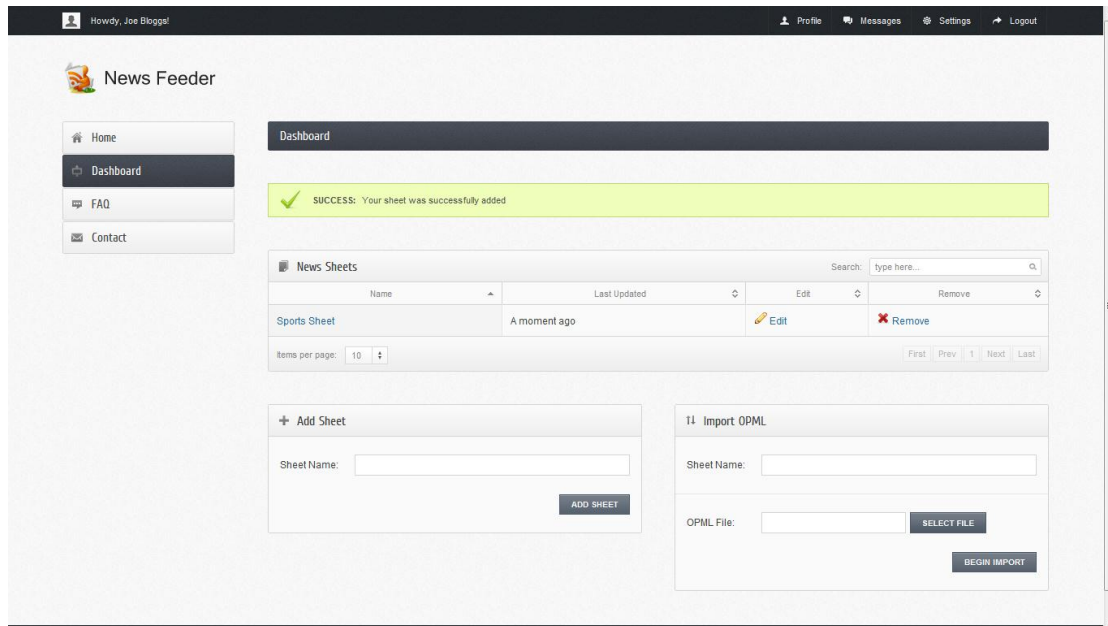

2. Remove unwanted feeds by clicking the **X** in the green box of every feed you wish to delete.
3. Once you have finalized your feeds, click the **Update Feeds** button.

Importing OPML

1. Navigate to your Account Dashboard.
2. Enter your new sheet name in the **Import OPML** section.
3. Click the **Select File** button under your new sheet name and navigate to your XML or OPML file.
4. Click the **Begin Import** button.
5. After importing your new sheet you will be presented with a success message.

Frequently Asked Questions

What is News Feeder?

News Feeder is a service designed to pull together all the online news content relevant to you into one place.

How secure is News Feeder?

News Feeder is set to use the 'Enable SSL' setting by default, but you can change this setting anytime. Here's some background on why we default to this option: If you sign in to News Feeder via a non-secure Internet connection, like a public wireless or non-encrypted network, your News Feeder account may be more vulnerable to hijacking. Non-secure networks make it easier for someone to impersonate you and gain full access to your News Feeder account, including any sensitive data it may contain like personal information or online log-in credentials. HTTPS, or Hypertext Transfer Protocol Secure, is a secure protocol that provides authenticated and encrypted communication.

To disable or re-enable this feature in News Feeder:

1. Sign in to News Feeder.
2. Click the **Settings** link in the upper-right corner.
3. In the Settings page, check or uncheck the **Enable SSL** checkbox.
4. Click **Save Changes**.

Please note that checking 'Enable SSL' will prevent you from accessing News Feeder via HTTP (Hypertext Transfer Protocol). If you trust the security of your network, you can turn this feature off at any time.

If you use a public computer to check your feeds, it's also important to sign out at the end each of your News Feeder sessions. Just click the "Sign Out" link in the upper-right corner. Also, make sure you close all News Feeder browser windows.

How to subscribe to feeds

If you already know the address of the feed you want to subscribe to, you can just click the **Edit Feeds** link from your sheet and paste the address in the text field under the **Add New Feed** heading. Otherwise, you can use our directory under the **Add Preset Feed** heading for an easy way to find and add feeds. As a third option, you can always find your own feeds.

Glossary of Terms

Item/Article – An individual piece of content. This includes articles from RSS feeds or items from other types of content sources (such as an email, forum thread, weather forecast, etc).

Feed – A collection of items/articles all related to the same content source (i.e. the same site or RSS feed).

Sheet – A grouping method for feeds. It displays feeds on the website as views the user has created.

Sheet Layout – The view used to display feeds and content associated with the sheet. An individual sheet may have many of these views. When referring to a sheet and the way it displays its content, we are implicitly referring to its default view.

Front-end – The web interface of the system, where users gain access to and interact with the system.

Back-end – An application which runs a continuous queue and crawls/parses content sources for articles to add to the database.
